

REAP THE REWARDS OF LED LIGHTING

Light-emitting diode (LED) technology has many advantages over incandescent light sources, including:

01 Lower energy consumption

02 Longer lifetime and improved physical robustness

03 Smaller size and faster switching

04 Uses only about 25% of the energy of traditional incandescent bulbs

05 Can last up to 25 times longer than traditional incandescent bulbs

06 Contributes towards Leadership in Energy and Environmental Design (LEED) certification

07 LED streetlight systems reduce light pollution

ANOTHER BRIGHT IDEA FROM OUC

OUConvenient **LIGHTING** | Indoor & Outdoor Solutions

For more than 75 years, OUC has provided reliable power to light up Orlando. We take our commitment to reliability even further – with OUConvenient Lighting. All of our products, of course, come with the high-level of customer service you’ve come to expect from OUC.

EFFICIENT INDOOR LIGHTING SERVICES

Reduce your overhead costs by reducing your overhead energy. The OUConvenient Lighting program helps customers upgrade their lights with our support every step of the way. We will perform an indoor lighting audit to identify inefficiencies within the existing indoor systems and upgrade inefficient lamps to new energy-efficient ones. And the fee is simply added to your existing OUC bill.

COMPLETE OUTDOOR LIGHTING SERVICES

OUConvenient Lighting provides a wide spectrum of commercial applications—from industrial parks to sports complexes to new subdivisions. To design a solution that’s just right for you, OUConvenient Lighting customizes your service package, allowing you to choose from dozens of fixture/pole combinations. OUConvenient Lighting can even retrofit your existing fixtures to new light sources or more efficient fixtures, which could result in lower utility costs. And we also provide preventive and corrective maintenance. Because we handle all up-front costs, developers can use the capital they would have spent on fixtures, poles and related equipment for other money-making ventures.
